VINTAGE REPORT

The Barossa experienced a wetter and cooler (2°C) than average winter and spring with good soil moisture levels. These conditions resulted in a later harvest, some three to four weeks, than recent years, which was a return to 'normal'. The later harvest allowed grapes to ripen more slowly and evenly with a gradual accumulation of sugars and flavours, which is exactly what we look for when making high quality Barossa wines. The yields were around 20 - 30% higher than the five-year average.
